APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 35147 is issued subject to the terms and conditions imposed in said Permit 35147 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 35147, 35149, 35150, 58926, 65364, 67368 and 67369 shall not exceed 1,886.78 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The permittee shall report to the State Engineer on a quarterly basis the effect of pumping the well under this permit on other previously existing wells that are located within 2,500 feet of the well under this permit.

Any pumping of water under this permit may be limited or prohibited to prevent any unreasonable adverse effects on an existing domestic well located within 2,500 feet of the well under this permit, unless the holder of this permit and the owner of the domestic well have agreed to alternative measures that mitigate adverse effects.

Dedicated monitoring wells shall be constructed and the number of wells and the location approved by the State Engineer before any water is put to beneficial use.

Water levels shall be taken on a monthly basis and a report submitted to the State Engineer on a quarterly basis which states the water levels at the monitoring wells and the monthly measured amount of water pumped from the production wells described under Permits 67368 and 67369.

The total combined duty of water under Permits 67368 and 67369 shall not exceed 473.76 acre-feet annually.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.13 cubic feet per second, **but not to exceed 473.76 acre-feet annually.**

Work must be prosecuted with reasonable diligence and be completed on or before:

June 23, 2005

Proof of completion of work shall be filed on or before:

July 23, 2005

Water must be placed to beneficial use on or before:

June 23, 2008

Proof of the application of water to beneficial use shall be filed on or before:

July 23, 2008

Map in support of proof of beneficial use shall be filed on or before:
